

Virus Testing Kit Market Depth Analysis, Covid-19 Impact, and Industry Forecast, 2021-2030

Increasing living standards and an ageing population lead to increased demand for chronic disease diagnosis and management, the burden of illness is changing.

PORTLAND, OREGON, US, December 13, 2021 /EINPresswire.com/ -- According to the report by Allied Market Research, titled, "Virus Testing Kit Market by Test Type (Direct Fluorescent Antibody [DFA] Test, Immunochromatographic Assay, Reverse Transcriptase Polymerase Chain Reaction [RT-PCR]-based Test, Agglutination Assay, Solid Phase Assay, and Flow Through Assay), Application (HIV, Hepatitis, Influenza, Measles, and COVID-19), and End User (Research Laboratories, Hospitals, and Clinics): Global Opportunity Analysis and Industry Forecast, 2021-2030". The report provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

Increasing living standards and an ageing population lead to increased demand for chronic disease diagnosis and management, the burden of illness is changing. All these variables are expected to deliver lucrative growth prospects for manufacturers of virus diagnostic kits.

Since viruses are constantly mutating and new diseases are being continuously discovered, the demand for virus testing diagnostic kits is high. For instance, the newly discovered coronavirus leads to one such respiratory disorder, which might show symptoms in between 2 to 14 days of infection. Further, the symptoms are similar to that of common cold, which makes it harder to detect the disease at an early stage.

COVID-19 Impact Analysis:

- COVID-19 is an infectious disease that originated in the Hubei province of the Wuhan city in China in late December. The highly contagious disease, caused by a virus, severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), is transmitted from human to human. Since its outbreak in December 2019, the disease has spread to almost 213 countries around the globe with the World Health Organization declaring it a public health emergency on March 11, 2020.
- At the global level, the COVID-19 pandemic has created an ongoing public health crisis. In the stage of deconfinement and social changes and beyond, diagnostic testing remains a core pillar. The diagnostic industry is committed to contributing and collaborating with policymakers and other stakeholders to play its part in ensuring that the lives and health of people can be secured as the world continues to tackle the pandemic.
