Who should buy this report?

Assuming that the reader is a manufacturer of positive airway pressure devices, they will be able to do the following –

- Understand their position as compared to some of the key players in the market
- Get information on parameters such as device adoption rate, therapy compliance rate, and discontinuation rate
- Assess the disease epidemiology in each region.
- Familiarize themselves with the necessary information related to changing market dynamics.
- Stay updated with the latest trends in the market with respect to connected devices.
- Understand the impact of COVID-19 on the market
- Identify some of the key players in the market and understand their value contribution

Key Questions Answered

- How has COVID-19 impacted the adoption of PAP devices in the market?
- What are the key regulations which influence the adoption of PAP devices in the market?
- What are some of the key companies in the global and regional PAP market?
- What are some of the key factors influencing the growth in adopting PAP devices across the globe?
- What are some of the growth opportunities which market players can capitalize on?
- What is the PAP device adoption rate for patients diagnosed with sleep apnea?
- What are the compliance and discontinuation rates for PAP therapy across regions?
- What are the fastest-growing countries in terms of PAP devices adoption?
- Which are the key diseases driving the adoption of PAP devices across the world?

About BIS Research

BIS Research is a global B2B market intelligence and advisory firm focusing on deep technology and related emerging trends, which can disrupt the market dynamics in the near future. We publish more than 200 market intelligence studies annually that focus on several deep

technology verticals.

Our strategic market analysis emphasizes market estimations, technology analysis, emerging high-growth applications, deeply segmented granular country-level market data, and other important market parameters useful in the strategic decision-making for senior management.

BIS Research offers syndicate as well as custom studies and expert consultations to firms, providing them specific and actionable insights on novel technology markets, business models, and competitive landscape.

BIS Healthcare vertical offers intelligence in the healthcare technology market for medical devices, digital health, life sciences, robotics and imaging, information technology, precision medicine, and other emerging healthcare technologies, covering the entire industry spectrum. In the past five years, BIS Healthcare has published more than 50 reports under the precision medicine banner. Additionally, BIS Research has been nominating 'Top 25 Voices in Precision Medicine' on its Insight Monk platform for the past two years successfully.
