

Cold Laser Therapy Market to Grow by 4.4% CAGR Steered by Growing Acceptance of Aesthetic Cosmetic Procedures

Cold Laser Therapy Market totaled US\$ 104.0 Mn in 2020. Demand outlook is expected to remain steady.

JUMEIRAH LAKES TOWERS, DUBAI, UNITED ARAB EMIRATES, December 13, 2021

/EINPresswire.com/ -- According to a recent study by Future Market Insights (FMI), the [Cold Laser Therapy Market](#) is expected to witness high growth during the forecast period. Sales of cold laser therapy are set to reach US\$ 165.4 Mn by 2031. This reflects a CAGR of around 4.4% over the forecast period (2021-2031).

Increasing awareness about various benefits of cold laser therapy is encouraging the adoption of cold laser or low-level laser therapy devices. Application of cold laser therapy in pain relief, treatment of musculoskeletal conditions, and nerve regeneration is increasing the sales in the market. These devices are increasingly installed in home care settings to offer relief from pain or inflammation to patients.

Due to increasing penetration of social media, people of all age groups are becoming overtly anxious about improving their appearance. Hence, the cold laser therapy market is rapidly growing owing to the growing interest in surgically improving appearance.

According to the World Health Organization (WHO), the global population of those above 65 years of age is expected to increase from nearly 1.0 billion in 2018 to around 2.1 billion by 2050 across the world.

With increasing demand from elder population as their skin is more prone to wrinkles, fine lines, flaccid skin, and other conditions, demand for cosmetic procedures is expected to surge.

Emerging nations such as India, China, Brazil, Russia, Mexico, and South Africa are offering

ample of growth opportunities for cold laser therapy devices market. One of the major factor for increased growth is rising prevalence of chronic diseases in the countries.

Exhibiting high demand for cold laser therapy to treat chronic pains, developing nations are likely to emerge as hotspot for cold laser therapy devices manufacturers.

Increasing research and development activities for innovation of novel technology and implementation of favorable reimbursement schemes in most developed countries is another factor fueling sales.

As per the report, key manufacturers are strengthening their supply chains particularly in regions such as Asia Pacific, Latin America and Middle East & Africa. Agreements, partnerships, and collaborations have emerged as key growth strategies adopted by leading players to expand their regional expansion and product portfolio.

For instance, in September, 2019, MedShift announced the 5-Year Strategic collaboration with BTL Aesthetics. The partnership will boost the presence of Emsculpt® device, the first and only technology to non-invasively harness high-intensity electromagnetic energy to firm muscle for a more toned figure.
