Electric bike popularity has exploded recently, with the latest figures indicating a growth rate for electric bicycles of 240% in the 12 months leading up to July 2021 (source NPD). “

When I used an electric bike in Croatia, I felt like I was able to truly appreciate the beauty around me.”

Jessica Kiedrowski

So why the jump in popularity of e-bikes in active travel?

Many point to the freedom and flexibility using an e-bike gives a traveler. Jessica Kiedrowski, Travel Packet Expert at Tripsite.com, said “When I used an electric bike in Croatia, I felt like I was able to truly appreciate the beauty around me. Climbing those mountains, instead of head down and

working hard, I was able to look up and take it all in.” Jessica is not alone in her thinking. The e-bike allows travelers of all ages and abilities to go places they otherwise wouldn't be able to, all the while, expending as much or as little effort as they like...taking in the view along the way.

Tour Specialists at Tripsite have curated a list of some of our most sought-after e-bike tours. Apart from this e-bike collection, we offer e-bikes on hundreds of tours. Here are a couple featured tours:
