Animal Health Market

“

Animal Health Market by Animal Type (Production Animal & Companion Animal), Product (Vaccines, Pharmaceuticals, Feed Additives), Distribution Channel (Retail, Veterinary Hospitals & Clinics)”

Allied Market Research

Rise in demand for protein rich foods such as milk, eggs, and meat, increase in adoption of companion animals, growth in population, changes in lifestyle, and surge in per capita income are the factors that drive the growth of the animal health market. Moreover, increase in demand for meat from countries such as China, the U.S., Brazil, and Japan, and the rise in risk of zoonotic diseases—infections that transfer from animals to humans have subsequently contributed toward the growth of the animal health market. However, affordability issues faced by the pet owners and a shift toward vegetarian diet hinder the industry augmentation.
