

Eubiotics market Study Report Based on Top Key Players , Future opportunities , Trend And Outlook 2028

Increasing awareness about feed quality and livestock health and ban on use of traditional antibiotic growth promoter

VANCOUVER, BC, CANADA, December 14, 2021 /EINPresswire.com/ --

[eubiotics market size](#) is expected to reach USD 10.89 Billion in 2028 and register a CAGR of 8.0% over the forecast period, according to latest analysis by Emergen Research. Key factors projected to drive market revenue growth include increasing global consumption of meat,

specifically chicken, milk, and eggs owing to a rapidly growing global population, shift in dietary preferences, changing food consumption patterns, rising demand for manufactured feed, and increasing awareness about feed quality on livestock health and wellness. In addition, increasing incidence of poultry disease outbreaks have resulted in more stringent regulations and norms being implemented by governments, which is a factor prompting livestock farmers to increase focus on livestock health and shift towards more healthy feeds and additives. Use of traditional antibiotic growth promoters in animal farming has been banned in various countries as it posed health challenges over the years. The ban has resulted in a rapid shift towards eubiotics as an alternative to antibiotics. Manufacturers have introduced targeted solutions to boost the immunity of livestock against bacterial and viral infections, enhance lactose tolerance levels, and improve digestive efficacy.

Eubiotics market that offers key insights about the regional and global scope of the Eubiotics market. It offers key details about the recent product launches, technological advancements, supply and demand ratio, and regulatory framework. The report also offers details about market size, market share, revenue growth, and CAGR during the forecast period of 2021-2028. The report also offers key insights about top companies in the market along with a thorough SWOT analysis, Porter's Five Forces analysis, and feasibility analysis to offer competitive edge to the readers. The report focuses on the recent trends, major challenges and opportunities, and

limitations pertaining to the ongoing pandemic.

The report also discusses the key players involved in the market such as BASF SE, Novus International, Lallemand Inc., Cargill Inc., Koninklijke DSM NV, Kemin Industries, Lesaffre Group, Behn Mayer Group, Yara International ASA, and DuPont. and others as well as new entrants in the market. It focuses on the recent mergers & acquisitions, joint ventures, collaborations, partnerships, licensing agreements, brand promotions, and product launches, among others. The report also provides details about the company overview, business expansion plans, product portfolio, manufacturing and production capacity, global market position, financial status, and consumer base.

Key insights presented in the report:

Market revenue shares by major business players, by type, by application, and market scope of global Eubiotics market

Sales revenue by key players and new entrants

Competitive analysis of the key players including aspects such as company overview, product or services specification, vendors, and buyers.

Recent mergers, acquisitions, product launches, recent investments, and joint ventures

Regional analysis to provide insight to recent trends and opportunities

The competitive analysis also includes regional analysis of major geographical regions. The report covers regions such as North America, Europe, Asia-Pacific, Latin America, and the Middle East and Africa. The report also offers a country wise analysis to impart better understanding of the global Eubiotics market with regards to market share, market size, production and consumption ratio, product launches and R&D activities, investment opportunities, and presence of key players in the region.

The report further segments the global Eubiotics market on the basis of product types and applications and provides insights into key factors influencing the revenue growth of the segments.

Emergen Research has segmented the eubiotics market on the basis of product, form, application, end-use, and region:

Product Outlook (Revenue, USD Billion; 2018–2028)

Probiotics

Prebiotics

Organic Acids

Essential Oils

Exogenous Enzymes

Form Outlook (Revenue, USD Billion; 2018-2028)

Solid

Liquid

Application Outlook (Revenue, USD Billion; 2018-2028)

Gut Health

Immunity

Yield

Production

End-use Outlook (Revenue, USD Billion; 2018–2028)

Poultry

Swine

Ruminant

Aquaculture
