According to a new report published by Allied Market Research, titled, "Smart Indoor Garden Systems Market by Type, Technology, and End-user: Global Opportunity Analysis and Industry Forecast, 2020–2027," the global smart indoor garden systems market size was valued at \$105,627.0 thousand in 2019, and is projected to reach \$176,559.1 thousand by 2027, registering a CAGR of 8.4% from 2020 to 2027.

Key players operating in the global smart indoor garden systems industry have adopted business expansion and partnership as their key developmental strategies to strengthen their foothold in the global market. For instance, in April 2019, BSH Hausgeräte GmbH, a subsidiary of Robert Bosch GmbH and Plantui, established partnership to expand their presence in Europe and increase their extensive global distribution network and boosts product development.

However, the outbreak of COVID-19 has a negative impact on the manufacturing and production

of smart indoor garden systems in the first and second quarter of 2020, and is likely to hamper the smart indoor garden systems market growth throughout the year. This has further affected the demand for smart indoor garden systems from the developed countries, including the UK, France, and Italy, thereby halting the production activities. In addition, the disruption of supply chain is causing hindrance in manufacturing of the smart indoor garden systems around the globe.
