

# Health Care Transformation Task Force Announces Increase in Value-Based Payment Arrangements

WASHINGTON, D.C., UNITED STATES, December 16, 2021 /EINPresswire.com/ -- The [Health Care Transformation Task Force](#) (HCTTF or Task Force), a group of leading health care payers, providers, purchasers and patient organizations, today announced that its provider and payer members reported having 61 percent of their business in value-based payment arrangements at the end of 2020.

“

These committed organizations have made investments in value-based care and supporting payment models that are instrumental in modernizing our health care system.”

*Emily Brower, HCTTF Chair*

Value-based care and payment arrangements focus on lowering costs and improving the quality of care to drive overall population health. The new report shows significant progress towards the goal and has increased twofold from the group’s first report of 30 percent in value-based arrangements in 2015.

“Task Force members have made significant progress in transforming the delivery system to improve care for

patients while reducing health care spending,” said Emily Brower, Senior Vice President, Clinical Integration and Physician Services, Trinity Health and HCTTF Chair. “These committed organizations have made investments in value-based care and supporting payment models that are instrumental in modernizing our health care system.”

“Over the past six years, Task Force members have remained steadfast in their commitment to advancing their value-based payment progress each year,” said Jeff Micklos, Executive Director, HCTTF. “The considerable progress they have made toward the Task Force’s goal reflects the hard work necessary to transform.”

“The Task Force and its members aspired to have 75 percent of their respective businesses operating under value-based payment arrangements by the end of 2020” said Blair Childs Senior Vice President Public Affairs, Premier Inc. and HCTTF Immediate Past Chair. “While this goal has not been reached, our membership’s progress still represents a significant achievement.”
