As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the purchase behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Market Trends:

The escalating demand for personal protective equipment (PPE), owing to the sudden outbreak of the COVID-19 pandemic, is one of the primary factors driving the global breathable films market. Moreover, the increasing consumer awareness towards feminine hygiene is also propelling the usage of breathable films in sanitary napkins. Apart from this, the rising popularity of biodegradable adult and baby diapers is acting as another significant growth-inducing factor. Besides this, the emerging trend of laminating breathable films with non-woven fabric composites using adhesives or point-bonding calendars to produce soft textiles, is further positively influencing the market growth. Additionally, the growing product utilization in mattresses, protective clothing, isolation clothing, disposable supplies, surgical gowns, etc., in the healthcare industry is anticipated to fuel the global breathable films market in the coming years.
