

# How to stay compliant with OSHA testing guidelines

*How to stay compliant with OSHA testing guidelines*

EDISON, NEW JERSEY, UNITED STATES OF AMERICA, December 17, 2021 /EINPresswire.com/ -- [Pipeline Medical](https://www.pipeline-medical.com) is hosting several webinars over the course of the next few weeks to help businesses, healthcare facilities, schools, universities, and other organizations stay compliant with the expected OSHA vaccination mandate.

The graphic features a dark blue background on the left with white and yellow text. On the right, there is a photograph of a woman wearing a light blue surgical mask and glasses, with a gloved hand adjusting it. The Pipeline Medical logo is in the top left, and 'Live Webinar' with a speaker icon is in the top right. The main headline is 'Are you ready?' in large, bold, yellow and white font. Below it, smaller white text reads: 'A mandate from OSHA is coming where all large, US-based employers must track vaccinations and test non-vaccinated workers regularly.' A white box with a blue border contains the text 'Fines will be substantial' in blue, followed by 'Attend our 30-minute webinar to learn how you can prepare.' in white. A yellow 'Register now' button is at the bottom. Below the graphic, the text 'Join the webinar' is centered.

Today, most major corporations like Blackrock, Deloitte, Delta Air Lines, CVS Health, McDonald's, DoorDash, MGM Resorts International have vaccination requisites in place for their employees. But retailers across the country report that 50-85% of their employees are not completely vaccinated.

In order to encourage a safe work environment, the president Joe Biden's administration announced a vaccination requirement for employers with 100 or more employees. It stated: OSHA is issuing a COVID-19 Vaccination and Testing Emergency Temporary Standard (ETS) to require employers with 100 or more employees (i.e., "covered employers") to:

Get Their Employees Vaccinated by January 4th and Require Unvaccinated Employees to Produce a Negative Test on at Least a Weekly Basis: All covered employers must ensure that their employees have received the necessary shots to be fully vaccinated – either two doses of Pfizer or Moderna, or one dose of Johnson & Johnson – by January 4th.

After that, all covered employers must ensure that any employees who have not received the necessary shots begin producing a verified negative test to their employer on at least a weekly basis, and they must remove from the workplace any employee who receives a positive COVID-19 test or is diagnosed with COVID-19 by a licensed health care provider.

If the [OSHA mandate](#) moves forward as planned in 2022, failure to comply with these rules would result in heavy penalties and fines.

Businesses have already started planning for the ETS to go into effect. After seeing the mandates return in states like California and New York, vaccination mandates will be an eventuality for most.

Pipeline Medical is currently conducting thousands of zero-cost tests at 100+ locations across the country, helping communities get back to normal.

When should you start planning?

If the mandate goes through the legislative process, it could be enforced as early as January 2022. "There's just not enough time to get ready for the ETS if you don't start now," says Julie Vanneman, an attorney with Dentons in Pittsburgh.

The [webinar](#), led by Pipeline Medical CEO Zachary Ducharme is a way for businesses to plan their strategy regarding the OSHA mandate.

About Pipeline Medical

Pipeline Medical, established in 2007, simplifies the complex world of medical supply procurement and delivers significant savings of time and price.

Pipeline Medical is an established and trusted market accelerator for the largest players in the medical supply space, partnered with the largest names in the industry. Pipeline currently serves thousands of members across the United States

Our customers benefit from consolidated operations and material management services, resulting in significant savings of time. Pipeline Medical provides its customers with 20%-50% savings on 700,000+ top brand medical supply products with next-day delivery.

Our procurement team works directly with manufacturers ensuring greater control over the production and delivery process, enabling quicker turnaround on supplying medical supplies to clients, which today include leading hospital systems, cities and states in the US, school systems, and more.

Pipeline Medical is a leader in medical distribution for non-acute physician offices and ambulatory surgical centers throughout the United States.

Visit our website for a free savings analysis on your products or to sign-up today, <https://www.pipelinemedical.com>

Our specialties include:

- Medical and Surgical Supplies and Instruments

- Laboratory Supplies
- Pharmaceuticals
- Capital Equipment
- Medical essentials
