

Antimicrobial Susceptibility Testing Market Increased Research Activities Boost Demand Opportunities

Antimicrobial susceptibility testing market is expanding, due to the increase in the prevalence of infectious diseases, epidemics, and the COVID-19 pandemic.

PORTLAND, OREGON, UNITED STATES, December 17, 2021 /EINPresswire.com/ -- The report segments the global antimicrobial susceptibility testing market on the basis of method type, product type,

end-user, and region. Based on product type, the manual products segment accounted for the largest market share in 2020, contributing to more than half of the total share, and is anticipated to maintain the lead during the forecast period. On the other hand, the automated products segment is anticipated to manifest the fastest CAGR of 7.3% from 2021 to 2030.

Antimicrobial susceptibility testing market generated \$3.04 billion in 2020, and is anticipated to reach \$4.73 billion by 2030, manifesting a CAGR of 5.8% from 2021 to 2030. Based on method type, the disk diffusion segment contributed to the largest share in 2020, accounting for more than two-fifths of the global antimicrobial susceptibility testing market. The same segment is expected to lead throughout the forecast period. However, the rapid automation method segment is expected to manifest the highest CAGR of 7.8% from 2021 to 2030.
