

Pulse Ingredients Market Is Expected To Reach USD 27.53 Billion Till 2028, At A CAGR Of 5.4% | Reports and Data

The increasing demand for pulse ingredients starch in various food and industrial applications is going to drive the market during the forecast period.

NEW YORK CITY, NEW YORK, USA,
December 20, 2021 /

EINPresswire.com/ -- According to the current analysis of Reports and Data, the global [Pulse Ingredients Market](#)

was valued at USD 18.34 Billion in 2020 and is expected to reach USD 27.53 Billion by the year 2028, at a CAGR of 5.4%. Pulse ingredients are the annual crops that yield between one and 12 grains. The term "pulses" is limited to crops harvested solely as dry grains, which segregates them from other vegetable crops which are harvested while still green. They are nutritious, healthy, and easy to cook with. Farming of these legumes also promotes sustainable agriculture, as they help decrease greenhouse gases, increase soil health, and use less water than other crops.

The growing population globally demands sustainably produced protein-rich foods. These crops are an attractive crop for the production of protein-rich seeds, that can be used as material for the production of pulse ingredients or can be eaten directly, such as protein concentrates, flours, or isolates, and starches. However, the flavor is a major factor restraining the use of many vegetable protein ingredients. Similar to soy ingredients, off-flavors in pulse ingredients are a barrier to consumption and limit the expansion of pulse ingredients into mainstream food applications.

Key Players:

Key participants include Ingredion, Roquette Frères, Emsland Group, Archer Daniels Midland, The Scoular Company, AGT Food and Ingredients, Anchor Ingredients, Batory Foods, Diefenbaker

Reports And Data

Spice & Pulse and Best Cooking Pulses.

Market Overview:

The food and beverage industry is involved in transforming raw food materials into consumer food products. The sector includes groceries, oils and fats, food additives, functional foods and beverages, canned food, packaged foods, health and natural foods, baby food, animal food, syrup, baked food, soft drinks, alcoholic and non-alcoholic drinks, energy drinks, and packaging. The companies in this industry are looking for innovations in food that meet the changing consumer's preferences in terms of global flavors, and varieties. The touchless transactions, open kitchen concept, ghost kitchens and e-commerce trends (especially during Covid 19) are reshaping the food and beverage sector.

Competitive Landscape:

The global Pulse Ingredients market research report provides a competitive strategy analysis portfolio to provide a better understanding of the competitive landscape. The study gives a 360-degree view on business policies, company profiles, price, cost, revenue, and business contracts. Furthermore, it offers massive data relating to recent trends, technological advancements, tools, and methodologies.

Further key findings from the report suggest:

- Pulses ingredients, including flours and proteins, can be used to add protein and fiber to baked goods—including bread, cookies, and crackers—and can be used to replace egg whites in pasta. Furthermore, pulse ingredients provide many nutritional and labeling benefits, have clean flavor and versatile functions, and can be used in a range of applications.
- Pea protein is highly used in pet food. It is used in formulations at 20-30% level as the highly nutritious protein as a rich source of lysine, arginine and glutamic acid amino acids. These amino acids are critical for active pets to rebuild muscle tissues. The use of pea proteins helps formulators replace meat ingredients while allowing meat the first ingredient in the label.
- New product lines by the companies and health-driven solutions are driving market growth. In March 2019, Archer Daniels Midland Company introduced a product line of consistent, high quality, and high performing organic flours, and the company will make use of pulse ingredients and wheat sources for producing these.
- As consumers become increasingly discriminating and health-conscious, they are demanding tasty and convenient foods that provide added nutritional and health benefits. Interest of people in the use of pulse ingredients in food preparations is growing mainly due to their nutritional properties, and because they exhibit good functional properties and are gluten-free.

Market Segmentation:

Type (Revenue, USD Million; 2016–2026, Volume, Million Tons; 2016-2026)

- Bulse Flours
- Bulse Starches
- Bulse Proteins
- Bulse Fibers & Grits

Source (Revenue, USD Million; 2016–2026, Volume, Million Tons; 2016-2026)

- Beas
- Chickpeas
- Beans
- Dentils

Function (Revenue, USD Million; 2016–2026, Volume, Million Tons; 2016-2026)

- Emulsification
- Texturization
- Gelation
- Water-Holding
- Adhesion
- Film Forming
- Blending

Application (Revenue, USD Million; 2016–2026, Volume, Million Tons; 2016-2026)

- Food & Beverages
 - oMeal & Meal Centers
 - oSnacks
 - oFruits & Vegetables
 - oSoups, Sauces, and Seasoning
 - oProcessed Fish, Meat, and Egg Products
 - oBakery & Confectionery Products
 - oOthers
- Feed
- Others

Regional Outlook (Revenue, USD Million; 2016–2026, Volume, Million Tons; 2016-2026)

- North America
 - oU.S.
 - oCanada
- Europe
 - oGermany
 - oFrance
 - oUK
 - oSpain
 - oItaly
 - oRest of the Europe

- Asia Pacific
 - o China
 - o India
 - o Japan
 - o Rest of Asia-Pacific
- Middle East & Africa
- Latin America
 - o Brazil
