

Single-Arm Medical Pendant Market Qualitative Insights on Application & Outlook by Share, Future Growth

Rise in prevalence of chronic disorders, surge in endoscopic procedures, technological advancements drive the growth of the single-arm medical pendant market.

PORTLAND, OREGON, UNITED STATES, December 20, 2021

/EINPresswire.com/ -- The surgery segment held the largest share in 2020, contributing to nearly half of the total share, and is estimated to maintain its lead position during the forecast period. However, the intensive care unit (ICU) segment is projected to manifest the highest CAGR of 7.4% from 2021 to 2030. The fixed medical pendant segment accounted for the highest share in 2020, contributing to nearly two-thirds of the global single-arm medical pendant market, and is projected to maintain its leadership status during the forecast period. However, the movable medical pendant segment is estimated to witness the largest CAGR of 7.3% from 2021 to 2030.

Impact of Covid-19 on Single-Arm Medical Pendant Market-

- The Covid-19 pandemic disrupted the healthcare system due to nationwide lockdown and disrupted the supply chain. There were limitations and bans on medical procedures and selected surgeries. These restrictions reduced the demand for single-arm medical pendants.
- Moreover, single-arm medical pendant manufacturing companies faced issues such as production at full capacity, in-person product demonstrations, and conferences due to

restriction on social gathering.

- Lockdown in Asia-Pacific countries such as India and China delayed the production and shipments of single-arm medical pendant products. This hampered the overall revenue of the global market.
