Surge in prevalence of chronic disorders, such as chronic musculoskeletal pain, is a key factor fueling the demand for taentadol across the globe.
Tapentadol is further used for the treatment of moderate to severe acute pain. The potency of this treatment lies somewhere between that of morphine and tramadol. Despite the lower occurrence of side effects, its analgesics efficacy is comparable to that of oxycodone. In addition, alarming rise in number of patients suffering from diabetes significantly contributes toward the growth of the global tapentadol market.

Surge in demand for analgesics is expected to increase the overall demand for tapentadol. In addition, rise in need for over-the-counter painkillers is expected to boost the demand for tapentadol, thereby driving the growth of the global tapentadol market.

The North America region accounts for the largest share of the tapentadol market, owing to high demand in countries such as the U.S. and Canada. The market in the Asia-Pacific region is expected to grow steadily with high demand and presence of several manufacturers of pharmaceutical products in the nations such as India and China.

COVID-19 impact analysis

The outbreak of the COVID-19 pandemic left a significant impact on the global economy. The tapentadol market report provides a detailed study of the micro- and macro-economic impacts of the pandemic. Moreover, the analysis depicts the direct impact of COVID-19 on the tapentadol market. It recapitulates the detailed information about the market extent and shares owing to the impact of the outbreak.
