The large-scale demand for synthetic proppants products such as shale gas and frac sand due to their low price is the major driver of the global market. Proppants play a crucial role in the extraction process by keeping the supply of natural gases and oil unhindered. Furthermore, synthetic proppants have witnessed high demand in the transportation and power generation industries.

It is further expected to witness high demand for frac sand for the fracking process during the forecast period. Ceramic synthetic proppants exhibit high-pressure and high-temperature

resistance property, thus are used widely in transports. The major trend of the synthetic proppants market is the incorporation of eco-friendly processes in oil wells, whereas the restraint of the market includes reduction in operating expenses.

COVID-19 impact analysis

The outbreak of the COVID-19 pandemic left a significant impact on the global economy. The Synthetic proppants market report provides a detailed study of the micro- and macro-economic impacts of the pandemic. Moreover, the analysis depicts the direct impact of COVID-19 on the Synthetic proppants market. It recapitulates the detailed information about the market extent and shares owing to the impact of the outbreak. The report also emphasizes on the supply chain and the sales of the Synthetic proppants market. Last but not the least; the study also exhibits a post-COVID-19 scenario, portraying different measures and initiatives taken by the government bodies across the world.
