

Healthcare Supply Chain Management Market 2021 Growth Drivers, Regional Outlook, Competitive Strategies and Forecast

Increasing demand to reduce the cost of healthcare is projected to drive the healthcare supply chain management market during the forecast period.

VANCOUVER, BC, CANADA, December 21, 2021 /EINPresswire.com/ -- [healthcare supply chain management market](#) is estimated to reach value of USD 3.67 Billion by 2027, according to a current analysis by Emergen Research. Focus of healthcare supply chain management (SCM) is to identify and reduce waste and help in supply chain decision making. It also contributes to the quality of the services offered. Emergence of cloud-based solutions is also fueling the market.

Increasing expenditure on healthcare requires higher efficiency in the delivery of services. Hospital supply chain management is confronted by different economic, environmental, and social issues. Growing awareness about healthcare supply chain management has propelled the demand for the same across the globe. On the other hand, lack of research in healthcare supply chain management and complex nature of the healthcare supply chain management are restraining the market.

driving factor is increase in the demand for better patient care and stringent government regulations. Advancements in technology, such as the Internet of Things (IoT) and cloud storage, have boosted the demand for healthcare supply chain management. Since supply chain objectives are not always aligned within hospitals, the market can be fragmented and inefficient. The supply chain management providers might prefer to use a product because they were trained with it, whereas hospital's purpose is to procure a quality product which it can afford.
