

Immunotherapy Drugs Market Size, Share, Research Study, Regional Trends, Growth and Industry

The increasing global cancer incidence and rising preference for personalized treatment over conventional treatment

VANCOUVER, BC, CANADA, December 21, 2021 /EINPresswire.com/ --

[immunotherapy drugs market](#) is

projected to be reach USD 365.57

Billion by 2027, according to a current

analysis by Emergen Research. The

global market for immunotherapy

drugs is anticipated to expand

significantly during the forecast period,

due to increasing global cancer incidence. Cancer is the world's second-largest reason of

mortality. It was liable for an estimated 9.6 million fatalities in 2018. Approximately 1 in 6

mortalities was attributed to cancer worldwide.

The increasing adoption of personalized treatment over conventional treatment is likely to boost the global immunotherapy drugs market during the forecast period. Rise in the incidence of lifestyle-related disorders is expected to propel the global immunotherapy drugs market during the forecast timeline. In case of hospital treatment, several lifestyle disorders, such as obesity, hypertension, diabetes, and insomnia, require intensive care. Therefore, one of the key factors driving the market for immunotherapy drugs is increase in the rate of disorders and related conditions.

However, the high rate of attrition in the production process phase is projected to hamper the global immunotherapy drugs market during the forecast period.
