

Valtira Announces Reaching Carbon Neutral in 2021

The Valtira team analyzed our carbon footprint, determining the offset purchase needed to become carbon neutral.

MINNEAPOLIS, MN, USA, December 21, 2021 /EINPresswire.com/ -- Every day that goes by, the need to reduce carbon emissions is getting more urgent.

“

It is up to all of us to help in the reduction to net zero carbon emissions as soon as possible. So we started with our part.”

*George Hadjiyanis. Valtira
Head of Marketing*

These emissions do not only come from smokestacks and vehicle exhaust systems. Technology solutions and IT infrastructure contribute as much as the the global airline industry.

"It is up to all of us to help in the reduction to net zero carbon emissions as soon as possible", said George Hadjiyanis, Valtira Head of Marketing. "So we started with our part. Valtira is excited to announce that in 2021, Valtira

became a [carbon neutral](#) company, a key milestone in the company's 18 year history."

The Valtira team analyzed our carbon footprint including direct and indirect metric tons (Mt) of CO2 emissions, determining the offset purchase needed to become carbon neutral. Learn more at <https://www.valtira.com/carbon-neutral>.

Our offset purchase is helping repurpose land in Papua New Guinea originally scheduled for commercial timber harvesting into a forest carbon project. This project is verified by Pachama, which is harnessing AI, satellite data and carbon markets to drive funding to effective forest restoration and conservation. Learn more at <https://pachama.com/explorer/projects/topaiyo>.

We will build on our carbon reduction leadership both for our company as well as our clients in 2022, and we look forward to updating you as we move forward together.
