

Green Data Center Market Seeking New Highs- Current trends and growth drivers

The report segments the global green data center market on the basis of solutions, end user, industry verticals, and geography.

PORTLAND, OR, UNITED STATES,
December 21, 2021 /

EINPresswire.com/ -- A green data center provides the same features and capabilities as that of a typical data center, however, it consumes less energy and space, and the design and operations are environmentally friendly. The key market drivers include increasing consumption of electricity, stringent environmental regulations, increase demand for data storage management, and rising energy cost. However, lack of awareness about the benefits of green data center, high initial cost, and incompatibility with present data center is expected to hinder the [green data center market](#) growth.
