Rise in outbreaks of meningococcal disease, increase in immunization programs across the world, and surge in research and development for vaccine technology drive the global meningococcal vaccine market. However, long duration required for vaccine production and high cost of vaccine development hinder the market growth. On the other hand, increase in healthcare expenditure and untapped potential in emerging economies create new opportunities in the coming years.

North America to maintain its dominance throughout the forecast period

Based on region, North America accounted for the largest market share in terms of revenue in 2018, holding nearly half of the global meningococcal vaccine market, and is estimated to maintain its lead position throughout the forecast period. This is due to surge in prevalence of meningitis disease and ease in availability of meningococcal vaccine products for treatment of the disease. However, Asia-Pacific is expected to portray the largest CAGR of 14.7% from 2019 to 2026, owing to surge in outbreaks of meningococcal diseases and widespread availability of products.
