

# Buttock Augmentation Market Increase in the Demand for Specific Formulations Presents Opportunities

*Increase in aesthetic consciousness among the population about their physical appearance, high social media influence growth of the buttock augmentation market.*

PORTLAND, OREGON, UNITED STATES, December 22, 2021

/EINPresswire.com/ -- The buttock implants segment held the highest market share in 2020, accounting for half of the global buttock augmentation market, and is estimated to maintain its leadership status throughout the forecast period. This attribute to the rise aesthetic consciousness among people. Increased buttock deformities due to aging and unhealthy lifestyle are major factors which drive the growth of the market. Moreover, the buttock injections segment is projected to manifest the highest CAGR of 21.7% from 2021 to 2030. This is due to less invasive nature of injections as compared to other surgical procedures.

The hospitals segment accounted for the largest share in 2020, contributing more than two-fifths of the global buttock augmentation market, and is projected to maintain its lead position during the forecast period. This is attributed to the fact that people get more support from healthcare professionals & experts, closer monitoring, and greater safety. Moreover, the aesthetic clinics segment is also expected to portray the largest CAGR of 22.0% from 2021 to 2030.

Global buttock augmentation market size, share, and growth - COVID-19 impact and forecast to 2030?

- The outbreak of the Covid-19 pandemic negatively impacted the global buttock augmentation market, owing to disruptions in the supply chain for various dietary supplements.
- All the manufacturing hub were temporarily shut down during lockdown, due to which, the ongoing and scheduled surgical procedures were delayed or canceled, which hampered the buttock augmentation market to an extent.
