While dietary improvement is a desirable goal for many common individuals ranging in various age bands, changing dietary patterns seems extremely hard for most of them also. Thus, it is becoming a common practice that many people are consuming additional dietary supplements to augment the daily intake of nutrients so that they may lead a healthier lifestyle.

The COVID-19 impact:

The COVID-19 pandemic has created endless disruptions to the manufacturing or production

industries due to a shortage of resources in different parts of the world. The leading players in the industry are skeptical about the market's future and try to redesign their strategies to support the challenge. The pandemic had a serious impact on the distribution chains as a result of regular lockdowns. The manufacturing industries have been disrupted due to reduced available human resources. The companies are incorporating different techniques to increase the production volume and trying to develop innovative solutions at an affordable price, which can meet customer requirements at a much lower cost.

Further key findings from the report suggest

- The overall dietary supplement sales for children are expected to rise during the forecast period. It was observed that Chinese and Indian parents were willing to spend relatively large amounts of money on the health of their children in relation to family income.
- A new trend emerging in the dietary supplements market is the need to use organic or sustainable ingredients. This trend is being driven by two fundamental shifts in this industry: the need to consume 'healthier' ingredients and consumers' increasing concerns for sourcing 'sustainable' products
- Nutraceuticals sub-segment has the highest market share of 32.6% in 2019 due to its highest usage of the eggshell membranes to formulate end-use dietary & nutritional supplements.
- In May 2019, Kewpie Corporation a Japanese company known for its chemical based products, announced the launch of a brand new collagen-boosting cosmetic ingredient that is extracted from the eggshell membranes. The ingredient would help maintain the skin firmness with the necessary collagen.
- Key participants include Microcore Research Laboratories, Biova LLC, Bolise Co. Limited, Stratum Nutrition, Eggbrane, Eggnovo SL, Kewpie Corporation, Mitushi Biopharma, Certified Nutraceuticals Inc, and Ecovatec Solutions, among others.
