“

Pink-hued elements harnessing the energy of the earth; Sedona Water brimming with the vitality of nature; the potency of the plants nurtured by the land... We send you the gift of Arizona.”

Sincerely Yours, Elli K

As a frequent visitor of Sedona, Arizona, Elli K discovered how natural elements found in the earth and sea contain properties that can help heal and rejuvenate our minds and bodies. Through partnering with a research lab at the University of Arizona, Elli K found a way to harness the energy and healing properties of these elements, creating a skincare system that repairs and restores damaged, aging skin - as if “reversing time.”

The three Elli K skincare products consist of four unique patented complexes with detoxifying

properties made from Sedona Water and the rare *Turritopsis dohrnii*, also known as the “immortal jellyfish.”

Those complexes are:

AZ10-BIOME™ - designed using a special double-fermenting process that blends cactus honey, echinacea and banana yucca with Sedona Water to provide deep moisture to the skin.

AZ4-Rx™ - formulated with the most skin-friendly fermented oils to enhance the skin’s natural protection against the external environment.

NEUROVITY™ - an anti-aging complex, the “secret” of the immortal jellyfish.

PROGELINE™ - makes the skin more elastic and smooth.

Also an accomplished musician, Elli K incorporated music into the skincare ritual as a way to also reinvigorate the spirit. The seven tracks of soothing symphonic music transport the listener on a sonic journey through the breathtaking landscapes of Arizona, while relaxing for 20 minutes after applying the Elli K Time Reverse Mask. Each track blends actual sounds of Arizona nature into the music, including the wind, birds and flowing water. Combining both skincare and music in a relaxing multi-sensory ritual, balance is restored both inside and out.

In addition to touch and sound, the luxurious fragrance of the Elli K skincare products reinvigorate the sense of smell. Created by experts based on over a century of research in Argeville, France, the natural fragrances within the products enhance the relaxation and restoration of balance in the body.
