At the same time, the report also encompasses the competitive landscape including comprehensive profiles of the major frontrunners in the industry. The leading players are considered based on their revenue size, product portfolio, market share, key marketing stratagems, and overall contribution to the market growth.

Increase in demand for electronic products in developed countries are key factors anticipated to augment growth of the market during the forecast period. Adoption of LCDs in smart handheld devices and automotive applications is projected to create growth opportunities for glass

substrates, which, in turn, fuels the growth of global glass substrates market over the projected timeframe. Factors such as increase in demand for smartphones, televisions, and tablets and rise in usage of hard disk in cloud applications are projected to fuel the market growth in the near future.

Efforts are being taken by market competitors to upgrade their research and development activities to introduce novel products in this field, thus, the demand for glass substrates is anticipated to grow at a significant rate during the forecast period with the improvement in technology. However, high production cost of glass substrates is one of the factors, which restrains the growth of glass substrate market.

COVID-19 impact analysis

The outbreak of the COVID-19 pandemic left a significant impact on the global economy. The Glass substrate market report provides a detailed study of the micro- and macro-economic impacts of the pandemic. Moreover, the analysis depicts the direct impact of COVID-19 on the Glass substrate market. It recapitulates the detailed information about the market extent and shares owing to the impact of the outbreak. The report also emphasizes on the supply chain and the sales of the Glass substrate market. Last but not the least; the study also exhibits a post-COVID-19 scenario, portraying different measures and initiatives taken by the government bodies across the world.
