“

Premenstrual Syndrome Treatment Market by Drug Type (Analgesics, Antidepressants, Oral Contraceptives & Ovarian Suppression Agents, and Others), Type (Prescription and OTC)”

Allied Market Research

Premenstrual syndrome (PMS) is a condition that affects emotional behavior and physical health of women during or few days before their menstrual cycle. PMS often leads to acne, tender breasts, bloating, irritability, and mood swings, which could be managed by lifestyle changes or drug treatment. Medication such as analgesics, antidepressants, oral contraceptives and ovarian suppression agents are generally used to manage PMS.

1) The COVID-19 impact on the Premenstrual Syndrome Treatment Market is unpredictable and is expected to remain in force till the fourth quarter of 2019.

2) The COVID-19 outbreak forced governments across the globe to implement strict lockdowns and banned import-export of nonessential items for most of 2020. This led to sudden fall in the availability of important raw materials.

3) Moreover, nationwide lockdowns forced manufacturing facilities to partially or completely shut their operations.

4) Adverse impacts of the COVID-19 pandemic have resulted in delays in activities and initiatives regarding development of reliable and innovative drone analytics systems globally.

The premenstrual syndrome treatment market is expected to experience a significant growth during the forecast period, owing to rise in demand for PMS treatment medication across the globe and increase in awareness related to PMS. Surge in number of target population is further anticipated to boost the premenstrual syndrome treatment market growth during the forecast period.

By drug type, the market is categorized into analgesics, antidepressants, oral contraceptives & ovarian suppression agents, and others. Presently, analgesics is the major revenue contributing segment and is estimated to show the same dominance during the forecast period, owing to preferable use of Nonsteroidal anti-inflammatory (NSAIDs) as first line treatment in management of PMS.
