North America to maintain its dominance during the forecast period

Based on region, North America accounted for the highest market share in terms of revenue, accounting for nearly two-fifths of the global cell therapy processing market in 2018, and is estimated to maintain its dominance during the forecast period. This is attributed to presence of well-established healthcare infrastructure, higher buying power, and surge adoption of advanced medical therapies. In addition, rise in prevalence of osteoporosis coupled with surge in geriatric population fuels the growth of the market in this region. Moreover, Asia-Pacific is expected to maintain the highest CAGR of 29.0% from 2019 to 2026, owing to presence of huge patient base, increase in research and development expenditure, and surge in usage of cell therapy processing products.
