The surge in terrorist activities, political tensions over border issues and safety concerns have resulted in a huge demand for night vision binoculars in the military and defense industries. To meet the growing demand for night patrolling and combat activities, the military and defense sector are adopting night vision binoculars. Government

investments in night vision binoculars by nations such as China, India, Germany, Russia, the U.S., and others are likely to drive market growth during the forecast period.

This entails the use of daytime binoculars for far vision, followed by the conquering of sectors

requiring night vision binoculars. Customers and market participants alike benefit from market variety. This paves the way for specialization in specific types and, as a result, monopoly over the product's uniqueness.

Market participants have been launching new, enhanced, and even personalized items in order to maintain their market share and expand their businesses. The producers' key focus is expected to be on expanding the product range and making it available to a wide spectrum of clients, rather than merely launching a product in one category.

The key factors driving the growth of the worldwide night vision binoculars market are its small size and light weight. Low-cost goggles and low-power requirements are two key factors propelling the worldwide night vision binoculars market forward.

The supply chain for consumer electronics is largely based in China. Because prominent consumer electronics device OEMs, as well as component OEMs, have production facilities in China, the shutdown of manufacturing facilities in China has had a significant impact on the consumer electronics industry's entire ecosystem.

The key market players profiled in the report include Thales group, FLIR® Systems, Inc., BAE Systems Plc, Collins Aerospace, Bharat Electronics Limited, L3 Technologies, Inc., Harris Group Inc., American Technologies Network Corp., Elbit Systems Ltd., SATIR

## COVID-19 Impact Analysis

U Consumers are choosing to buy basics like food and cleaning supplies over non-essential,
consumer electronics products such night vision binoculars due to reduced discretionary
incomes and depressed consumer sentiment.
☐ The supply chain for consumer electronics is largely based in China. Because prominent
consumer electronics device OEMs, as well as component OEMs, have production facilities in
China, the shutdown of manufacturing facilities in China has had a significant impact on the
consumer electronics industry's entire ecosystem.
