Global Data Governance Market Trends:

The global market is majorly driven by a considerable rise in data generation. This, in confluence with the rising implementation of strict data regulatory compliance across numerous industries, is providing an impetus to the market growth. Furthermore, the extensive usage of data governance across the telecom, information technology (IT) and retail sectors has significantly contributed to the market growth. Moreover, efficient data governance forms an integral part of the government sector as it enables greater data access and increases overall efficiency and accountability, thereby driving the market growth. In addition to this, the increasing incidences of

data misuse by multiple private organizations and the rising cyber security threats have escalated the requirement for data governance, which is expected to create a favorable market outlook.
