

Human Microbiome Therapeutics Market Trend, Growth, Forecast, Key Players and Competitive Landscape Research Report

The rising application into personalized medicine and nutrition and growing technological advancements in metagenomics is driving the demand for the market.

CANADA, BC, VANCOUVER, December 28, 2021 /EINPresswire.com/ -- The global [Human Microbiome Therapeutics Market](#) is forecasted to be worth USD 1,098.4 Million by 2027, according to a current analysis by Emergen Research. The human microbiome therapeutics market is

forecasted to augment rapidly due to the rising application of human microbiome therapeutics into personalized medicine and nutrition. The report is formulated with the updated and latest information of the global Human Microbiome Therapeutics market further validated and verified by the industry experts and professionals. The report sheds light on the mergers and acquisitions, collaborations, joint ventures, brand promotions and product launches, agreements and partnerships, and corporate and government deals.

Besides, the growing technological advancements in metagenomics and the therapeutic system is anticipated to further propel the market growth over the forecasted timeframe. However, huge infrastructure and equipment costs and complicated laboratory bacteria development and isolation procedures are likely to impede market growth over the forecast timeline. Moreover, the adverse effects of the coronavirus pandemic on the global Human Microbiome Therapeutics market, as well as its fundamental segments, have also been elucidated in this report. The pandemic has led to some devastating effects on the global economy, besides disrupting the functioning of the Human Microbiome Therapeutics industry.

Key Highlights From The Report

In August 2019, the completion of the construction of a new state-of-the-art production facility had been announced by BiomX Ltd. The new facility is based in Ness Ziona and will facilitate the clinical development of candidate phage products for BiomX and may be extended in the coming years to satisfy commercial manufacturing requirements. The development has been a

significant phase on the way to clinical development in this current period of live biotherapeutics, which involves phages and also human-derived cells and bacteria. During the forecast timeframe, the probiotics segment is expected to dominate the market. Probiotics are organisms, such as bacteria and yeasts, which provide health benefits when being consumed.

The small molecule therapies segment accounted for the largest market share, and, due to its extensive use, it was anticipated to witness the highest growth over the forecast period.

The latest research report by Emergen research, named 'Global Human Microbiome Therapeutics Market - Forecast to 2027', entails a comprehensive review of the global Human Microbiome Therapeutics market's present and future trends. The report additionally sheds light on the emerging growth opportunities in the business sphere that are anticipated to bolster the growth of the market. A clear outline of the competitive landscape of the market is expected to help businesses involved in this sector decipher the optimal business moves to reach their desired business goals. The Global Human Microbiome Therapeutics Market Report offers extensive knowledge and information about the Human Microbiome Therapeutics market pertaining to market size, market share, growth influencing factors, opportunities, and current and emerging trends. These facts and figures help readers evaluate the global market growth, production, and consumption rates, volatility in demand and product prices, and upcoming market trends over the projected period.

Additionally, the report provides an extensive analysis of the Human Microbiome Therapeutics market, including key data, such as factors influencing the growth of the market, buyers and vendors, production and consumption, and revenue. To gain a better understanding, the report is further segmented into sections such as product types offered by the market, application spectrum, companies, and key geographical regions where the market has established its presence. Furthermore, the report provides a comprehensive overview of the Human Microbiome Therapeutics market along with product portfolio and market performance. The report offers key insights into market share, supply chain analysis, demand and supply ratio, import/export details, and product and consumption patterns.

Key participants include Oxidien Pharmaceuticals, LLC, BiomX Ltd., LNC Therapeutics SA, Commense Inc, Embion Technologies SA, DermBiont, Inc, CoreBiome, Inc., Carbiotix AB, Biotagenics Inc., and Finch Therapeutics, among others.

Emergen Research has segmented the global Human Microbiome Therapeutics Market on the basis of product, approach, therapeutic area, diseases, and region:

Product Outlook (Revenue, USD Million; 2017-2027)

Prescription Drugs

Probiotics

Medical Foods

Prebiotics

Approach Outlook (Revenue, USD Million; 2017-2027)

Microbial Consortia

Phage Cocktail

Small Molecule Therapies

Microbial Ecosystems

Genetically Modified Single Strain Bacteria

Single Strain Whole Bacteria

Therapeutic Areas Outlook (Revenue, USD Million; 2017-2027)

Oncology

Autoimmune Disorders

Dermatological Disorders

Metabolic Disorders

Infectious Disease

Others

Diseases Outlook (Revenue, USD Million; 2017-2027)

Crohn's Disease

difficile

Diabetes

Irritable Bowel Syndrome

Others

The report aims to deliver a comprehensive understanding of the Human Microbiome

Therapeutics market growth and expansion in each key region of the world. It offers accurate estimations about the expected market size and growth over the projected timeline of 2020-2027.

Key Geographies Profiled in the Report:

North America(the U.S., Mexico, and Canada)

Asia Pacific(China, Japan, India, and Rest of Asia Pacific)

Europe(the U.K., France, Germany, and Rest of Europe)

Latin America(Brazil and Rest of Latin America)

Middle East & Africa(GCC Countries and Rest of Middle East & Africa)

Table of Content

Chapter 1. Methodology & Sources

1.1. Market Definition

1.2. Research Scope

1.3. Methodology

1.4. Research Sources

1.4.1. Primary

1.4.2. Secondary

1.4.3. Paid Sources

1.5. Market Estimation Technique

Chapter 2. Executive Summary

2.1. Summary Snapshot, 2019-2027

Chapter 3. Key Insights

Chapter 4. Human Microbiome Therapeutics Market Segmentation & Impact Analysis

4.1. Human Microbiome Therapeutics Market Segmentation Analysis

4.2. Industrial Outlook

4.2.1. Market indicators analysis

4.2.2. Market drivers analysis

4.2.2.1. The growing technological advancements in metagenomics

4.2.2.2. The rising application into personalized medicine and nutrition

4.2.2.3. Increasing incidence of drug-related side effects

4.2.3. Market restraints analysis

4.2.3.1. Large infrastructure and machinery costs

4.2.3.2. Complicated procedures

4.3. Technological Insights

4.4. Regulatory Framework

4.5. Porter's Five Forces Analysis

4.6. Competitive Metric Space Analysis

4.7. Price trend Analysis

4.8. Covid-19 Impact Analysis

Report Highlights:

The report scrutinizes the salient factors influencing the growth of the market in the near future.

Besides offering a vivid depiction of the global Human Microbiome Therapeutics business sphere and its fundamental operations, the latest report provides the industrial chain analysis and list down the current and future market trends and growth opportunities.

The report sheds light on the prominent market contenders, as well as their business strategies and long-term expansion plans.

The report includes information on the present and historical market scenarios, which helps forecast the market conditions over the next eight years (2020-2027).
