populations drive the global endodontic consumables market. In addition, rise in dental tourism and increase in awareness regarding oral health further fuel the market growth. However, the risks associated with endodontic consumables hamper the market growth. On contrary, surge in disposable income and growth in R&D in healthcare sector usher in an array of opportunities in the coming years.

The endodontic consumables market is segmented into product, end user, and region. On the basis of product, the market is divided into endodontic files, obturator, and permanent endodontic sealer. The endodontic file segment dominated the market in 2020, due to rise in number of root canal procedures, advancement in technology in the field of orthodontics and lack of proper oral hygiene. Further, the endodontic file segment is classified into materials and type. Under the material, the endodontic consumables market is classified into stainless steel files and alloy foils. Under the type, the endodontic consumables market is classified into a handheld RC file and rotary file.

□ □□□□□-□□ □□□□□□□□:

1) The COVID-19 impact on the Endodontic Consumables Market is unpredictable and is expected to remain in force till the fourth quarter of 2021.

2) The COVID-19 outbreak forced governments across the globe to implement strict lockdowns and banned import-export of nonessential items for most of 2021. This led to sudden fall in the availability of important raw materials.

3) Moreover, nationwide lockdowns forced manufacturing facilities to partially or completely shut their operations.

4) Adverse impacts of the COVID-19 pandemic have resulted in delays in activities and initiatives regarding development of reliable and innovative drone analytics systems globally.
