Notebook

explain notebook is a computer is a portable personal computer. Flat-panel technology is the technology used in notebooks to make them lighter. The advantages of this technology include its low power requirements, low cost, and low voltage consumption, all of which contribute to its widespread adoption.

A notebook computer is a battery- or AC-powered personal computer that is generally smaller than a briefcase and can be easily transported and used in temporary spaces such as airplanes, libraries, temporary offices, and meetings. Notebook computers are typically more expensive than desktop computers with comparable capabilities because they are more difficult to design and manufacture. Blank notebooks are commonly used for drawing and scrapbooking. Notebooks for writing usually have some kind of printing on the writing material, even if it's just lined to help align writing or certain types of drawing. Page numbers are preprinted in the inventor's notebooks to support priority claims. They could be classified as grey literature. Graphic decorations can be found on many notebooks. Personal organizers can include a variety of preprinted pages.
