

Micromanipulators Market Overview, Growth, Development and Future Prospects, 2022-2027

Electric micromanipulators segment would continue to generate the highest revenue throughout the forecast period.

PORTLAND, OREGON, UNITED STATES, December 31, 2021 /EINPresswire.com/ -- According to the report by Allied Market Research, titled, "Micromanipulators Market By Type (Hydraulic, Electric, Manual) and By Application (Embryonic stem cell transfer, Intra-cytoplasmic sperm injection (ICSI), Pronuclear zygote injection, Embryo reconstruction, Microsurgical, Biopsy, Industrial Micromanipulation, microelectronics, Flat screens, packaged parts and probing functions, drug discovery) - Global Opportunity Analysis and Industry Forecast, 2022 - 2027". The report provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

These devices are generally used along with a microscope equipped with an input joystick, a mechanism to reduce the area of movement. They cater to a wide variety of applications ranging from cell micromanipulation to industrial micromanipulation, embracing semiconductors and electronic industries, among others. Popular types used for a wide range of applications, which depends on the precision and control required at the micro levels. Intracytoplasmic sperm injection (ICSI) is the most common application of cell micromanipulation techniques in humans. Rising incidence of infertility cases across the globe is the major factor boosting the adoption rate for obtaining rapid results in IVF-ICSI procedures.

Comprehensive competitive analysis and profiles of major market players, such as

The key companies operating in the sector, include Narishige Co. Ltd., Research Instruments Ltd., Eppendorf AG, Sutter Instruments, The Micromanipulator Company, Sensapex, Inc., Luigs and Neumann, Scientifica, Ltd., and Siskiyou Corporation, among others. These companies offer micromanipulation technology across all the micromanipulation application sectors.

Key Findings of Micromanipulators Market:

Hydraulic micromanipulator is projected to be the fastest growing segment during the forecast period.

Within cell micromanipulators application, ICSI segment is projected to exhibit the fastest growth, both in terms of revenue and volume, during the forecast period.

Within industrial micromanipulation application, semiconductors and microelectronics segment would continue to lead, accounting for more than three-fourth of the overall market revenue in 2020.

Asia-Pacific is anticipated to be the fastest growing market, registering a CAGR of 29.9% from 2015 to 2020.

About Us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing high-quality data and insights. We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
