COVID-19 Pandemic disrupted the entire world and affected many industries. Get detailed COVID-19 impact analysis on the Swimming Pool Construction Market

PORTLAND, OR, UNITED STATES, January 3, 2022 /EINPresswire.com/ -- The [swimming pool construction market](#) includes revenue generated by construction of new swimming pools and renovation of old swimming pools in residential and non-residential infrastructure. These swimming pools are generally built with materials such as concrete, fiberglass, and vinyl liner. The pools are designed upon the requirement of the user, whether it should be in-ground or above-ground.

The swimming pool construction market size was valued at \$ 6.8 billion in 2019, and is expected to reach \$7.4 billion by 2027, registering a CAGR of 3.8% from 2020 to 2027. In 2019, the North America region dominated the swimming pool construction market, followed by the LAMEA region.

Attributed to the rise in awareness regarding health, there has been increase in number of gyms that are equipped with swimming pools. This has given rise in construction of swimming pools in the last few years. In addition, rise in tourism has led to construction of swimming pools in hotels and rented bungalows.

Moreover, rise in per capita income of the people has raised the standard of living, which, in turn, has escalated the construction of swimming pools in private residences as well. However, the high construction cost and thereafter high maintenance cost act as a restraint to the swimming pool construction market.

Further, the outbreak of COVID-19 has led to a halt in construction and manufacturing activities across the globe. Halt in logistics services has led to interruption of supply chain, which, in turn, hinders the swimming pool construction market growth.
