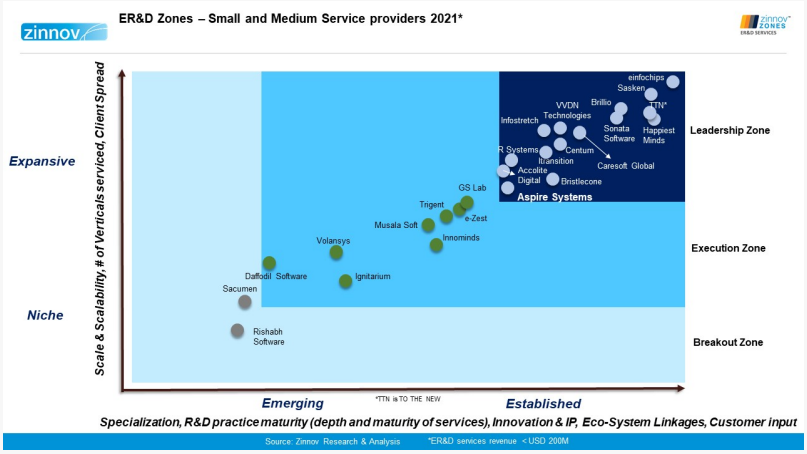
Aspire Systems Emerges as a Leader in the Zinnov Zones ER&D Services 2021 Assessment

Aspire Systems develops high quality software using frameworks & the Software Infinity methodology making them leaders in the Zinnov Zones ER&D 2021 Assessment



Aspire Systems: Leader - Small & Medium Business Providers 2021

OAKBROOK, ILLINOIS, UNITED STATES OF AMERICA, January 3, 2022 /EINPresswire.com/ -- Aspire Systems, a pioneer technology services company, has announced that it has been recognized as a Leader in the Small and Medium Service Providers segment in the 2021 Zinnov Zones for ER&D Services Assessment.

Zinnov's latest ER&D evaluation saw participation from over 50 global Service Providers from across 24 different verticals and micro-verticals, and is based on a rigorous RFI process and interactions with leading Engineering Service Providers. Zinnov Analysts conducted a thorough assessment to rate Service Providers according to their technological prowess, capabilities, and scalability.

Aspire Systems' Software Engineering Services provides cutting-edge solutions and proprietary frameworks that help organizations develop high quality applications. With frameworks like Propel, Techcello, and AFTA, Aspire was able to increase performance, reduce time-to-market, reduce costs, and optimize release cycles. Additionally, with Agile Producteering principles churning out high quality software, it cemented Aspire Systems' place as a "Leader" in the Small and Medium Business Service Providers segment and also as a "Niche-Established" vendor overall.

According to Aju Mathew, VP of Development Services in Aspire Systems, "This is yet another recognition of our deep product engineering capability, having worked with Software & Hi-Tech firms for over 2 decades. With the acquisition of a few companies in similar/complementary

space over the past 2 years, we have strengthened our overall Product and Digital Engineering capabilities to build best-in-class products/platforms that help future-proof our clients' interests in the focused verticals and markets. We have been able to monetize our industry-specific digital accelerators to improve our customers' go-to-market timeframes and thereby add value to their business."

Sidhant Rastogi, Managing Partner, Zinnov, said, "Aspire Systems' robust capabilities in Digital Engineering have helped them become a leader in the 2021 ER&D Zinnov Zones assessment in the Small and Medium Service Providers category. Aspire's targeted acquisitions of RapidValue, iApps, have helped it strengthen its capabilities to serve customers better – across both technology and location. Additionally, its concentrated solution accelerators like AFTA, AURAS, seamless data applications & integrations along with PRIOS, DYOB, and iPOT as part of its Digital Engineering solution accelerators, have helped Aspire to consolidate its positioning across Digital Engineering, Software Platform Engineering, AI/ML in BFSI, and Consumer Software Engineering."

About Aspire Systems:
Aspire Systems is a global technology services firm serving as a trusted technology partner for more than 200 customers across the globe.
