

Traffic Jam Assist Systems Market To Reach USD 6.38 Billion By 2028, Says Emergen Research

*Traffic Jam Assist Systems Market Trends
– The rise in the government initiatives to prevent road accidents.*

VANCOUVER, BC, CANADA, January 5, 2022 /EINPresswire.com/ -- A closer look at the aspects including but not limited to Traffic Jam Assist Systems market segmentation by the end-user, end-use, geography, type, and application forms an integral part of the research report.

[Traffic Jam Assist \(TJA\) Systems Market](#)

is forecasted to be worth USD 6.38 Billion by 2027, according to a current analysis by Emergen Research. Due to growing cases of road accidents due to human errors and congestion, the market for Traffic Jam Assist (TJA) Systems is expected to expand substantially over the forecasted period. According to the World health organization, as a result of road traffic crashes, nearly 1.35 million people die per year globally. Besides, governments' rising concern and initiatives to prevent road accidents are expected to further propel the market growth over the forecasted timeline. Crashes in road traffic cost most nations 3 % of their gross domestic product. Moreover, the rising preference to reduce traffic congestion is likely to augment market growth shortly.

The emergence of technologically advanced agricultural drones is expected to drive the demand for technology. The drones are used for the assessment of crop spraying, crop monitoring, and crop health. The drones with thermal sensors help identify the region that requires irrigation changes, and it also reduced the presence of the chemical in groundwater. With the help of Artificial Intelligence, the drones with thermal sensors are able to calculate the vegetation index of the crops and indicator of health by measuring the heat signature of the crop.

The rise in the prevalence of critical wounds, growing number of cases surrounding burns, traumas and different surgeries along with the increasing disposable income of consumers

coupled with the rising awareness of the requirement for the diagnosis of complex wounds, are the key drivers of the Traffic Jam Assist Systems market. The steep rise in the per capita disposable incomes across all developed economies and the affordability of high-end products throughout developing economies also contribute positively to the growth of the market.

Additionally, the report also gives an insight into product portfolios, costs, sales, production capacities, and market players. Raw materials, demand analysis, product flow, and distribution channels have been studied and surveyed extensively in this research report. The key growth trends and opportunities are offered through a thorough investigation and examination of the market. A detailed course of development is offered in the report along with insights into businesses connected with it, which include firms, industries, organizations, vendors, and local manufacturers.

The report offers a comprehensive overview of the competitive landscape and covers company profiles, production and manufacturing capacity, product portfolio, expansion strategies, and business initiatives such as mergers and acquisitions, joint ventures, collaborations, partnerships, and product launches and brand promotions among others.

Prominent Players Analyzed in the Report: Mercedes-Benz, Automotive Group., ZF Friedrichshafen AG, NVIDIA Corporation, AUDI AG, ŠKODA AUTO, Robert Bosch GmbH, Hyundai Mobis, Ford Motor Company, Bayerische Motoren Werke AG, and Continental AG among other.

The report covers key points of the market, including the standards, regulations, and policy changes applied by the government on the industry for the coming years. The report encompasses thorough research carried out by the application of advanced analytical tools such as SWOT analysis and Porter's Five Forces analysis to pinpoint the growth trends and patterns. Factors likely to influence the growth of the market, current trends, opportunities, restraining factors, and business landscape are discussed in-depth in the market study.

Furthermore, the report divides the Traffic Jam Assist Systems market into key segments and sub-segments to offer an analysis of the product type and application spectrum of the industry. It also offers predictions about the segments expected to show significant growth during the projected timeline.

Emergen Research has segmented the global Traffic Jam Assist (TJA) Systems Market on the basis of component, level, method, and region:

Component Outlook (Revenue, USD Billion; 2017-2027)

ECUs

Automotive Cameras

LiDAR

Ultrasonic Sensors

RADAR

Level Outlook (Revenue, USD Billion; 2017-2027)

Level 2

Level 3

Method Outlook (Revenue, USD Billion; 2017-2027)

Lane Tracking System

Vehicle Detection and Collision Avoidance System

Auto Steering and Speed Control System

Others

The report further examines the market in the key regions of the world with regard to production and consumption patterns, import/export, supply and demand ratio, revenue generation, market share and size, and presence of prominent players in the regions. The report also covers the expansion plans undertaken by companies in the regions under the regional analysis section.

Regional Segmentation

North America (U.S., Canada)

Europe (U.K., Italy, Germany, France, Rest of EU)

Asia Pacific (India, Japan, China, South Korea, Australia, Rest of APAC)

Latin America (Chile, Brazil, Argentina, Rest of Latin America)

Middle East & Africa (Saudi Arabia, U.A.E., South Africa, Rest of MEA)

Overview of the Traffic Jam Assist Systems Market Report:

Introduction, Product Scope, Market Overview, and Opportunities

Analysis of the Manufacturers with sales, revenue, and price analysis

Comprehensive analysis of the competitive landscape

Extensive profiling of the key competitors along with their business strategies and market size

Regional analysis of the market along with sales, revenue, market share, and global position

Country-wise analysis of the market along with types, applications, and manufacturing

Strategic recommendations to established players as well as new entrants

In-depth analysis of the risks, restraints, and limitations in the Traffic Jam Assist Systems industry
