Key Trends -

- This can be attributable to customers' increased adoption of IPTV, OTT, and IoT technologies. Mobile device advancements and the proliferation of internet content have sparked a global revolution in how consumers engage with and access online content. The global usage of digital rights management solutions has increased in response to the growing need for better watching experiences.

- Due to increased use of new technologies and digitization, Asia Pacific is predicted to rise significantly throughout the projection period. The industry is also growing due to the increasing demand for secure digital material.

.

- In terms of deployment type, the cloud-based segment dominated the market in 2019 and is likely to continue to do so throughout the forecast period. This can be linked to enterprises' rising use of cloud-based solutions, which is boosting the volume of digital transactions while also making cloud-based deployment more straightforward and convenient.

Impact of Coronavirus (Covid-19) Pandemic

As a result of the Covid-19 outbreak, many industries have undergone substantial changes. The global lockdown implemented to curb the spread of the Covid-19 pandemic is expected to boost the media and entertainment industry tremendously. For amusement, people use streaming services such as Netflix, Amazon Prime Video, and Zee5, which increases network traffic burden.

Market Segments covered:

By Component: Software and Service

By Deployment Type: On-premise and Cloud-based

By Organization Size: SMEs and Large Enterprises

By End-use Industry: Retail, BFSI, Government Sector, Healthcare, Media and Entertainment, and Others
