

USFDA grants Emergency Use Authorization for Roche's COVID-19 At-Home Test

With cases rising again with the Omnicron variant, the USFDA grants EUA for Roche's COVID-19 rapid at-home diagnostic kit

LONDON, GREATER LONDON, UK, January 6, 2022 /EINPresswire.com/ -- Last few days of our annual market report sale! Buy now - <https://www.thebusinessresearchcompany.com/global-market-reports>

In December 2021, the USFDA granted Emergency Use Authorization (EUA) for F. Hoffmann-La Roche Ltd's COVID-19 At-Home Test, an over-the-counter diagnostic kit. The COVID-19 At-Home Test is a rapid chromatographic immunoassay for the qualitative detection of the nucleocapsid protein of SARS-CoV-2 virus. The COVID-19 At-Home Test uses a simple nasal swab sample to enable individuals to self-test at home and receive accurate, reliable, and quick results in 20 minutes for SARS-CoV-2 and other variants, including Omicron.

According to The Business Research Company reports, the demand for COVID19 detection kits will continue to grow owing to the increasing incidence of COVID-19 and other variants such as Omicron and the rising demand for cost-effective and quick COVID-19 detection kits. The [global COVID-19 detection test kits and consumables market size](#) was estimated to grow from \$5.2 billion in 2020 to \$6.1 billion in 2021 at a compound annual growth rate (CAGR) of 17.3%. The market is further expected to reach \$8 billion in 2025 at a CAGR of 7.1%. The easing of USFDA regulatory processes for COVID-19 detection kits will also contribute to the growth of the COVID-19 detection kits and consumables market. According to World Health Organization (WHO), COVID-19 cases rose by 11% globally in December 2021, and Omicron has become the dominant strain in many countries. This is expected to drive the demand for COVID-19 detection test kits during the forecast period.

TBRC's [COVID-19 rapid test kits market report](#) is segmented by test type, kit type, specimen type, end-users, and geography

- By Test Type- RT PCR test, rapid antigen test, rapid antibody test, and others
- By Kit Type- PCR machines, equipment and extraction kits, and reagents
- By Specimen Type- Nasopharyngeal swab, oropharyngeal swab, nasal swab, blood, and others
- By End-Users- Hospitals and clinics, diagnostic laboratories, home care, and others
- By Geography- North America, South America, Asia Pacific, Western Europe, Eastern Europe, Middle East, Africa

Research is sourced from TBRC reports, FDA.

The forecasted revenue of the company is calculated based on the assumption that the company's market share will remain the same during the forecast period.
