New products that contain improved capabilities have been launched by leading market players. They have taken necessary steps to improve accuracy and overall functionality of products. Companies have manufactured comfortable construction helmets by placing ventilation slots in some models that allows body heated air to escape

through the top of the hard helmet and cooler air drawn inside the helmet from the bottom.

The growth in commercial and residential buildings drives the growth of the construction sector majorly in the developing countries, which has increased the demand for construction helmets as there is huge safety concerns for workers and laborers in this industry. Head is considered to

be the most vital part of human body as it is naturally covered by bone. Safety for head comes first which is the main reason behind the high demand for helmets. These helmets are hard hats protect the workers from head injury; act as first line of defense. Safety for workers and laborers working in construction sites are company's first and foremost responsibility for which companies are providing PPE to their workers.
