Kidney/Renal Function Test Market Report

Group expects the market to grow at a CAGR of around 6% during 2021-2026. A kidney/renal function test is suggested by doctors if a patient experiences muscle cramping, discomfort during urination, and blood in the urine. It helps determine the presence of minerals, proteins, electrolytes, and glucose in the blood. It also assists doctors in monitoring the response of kidneys to the treatment and determining the progression of the disease.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Kidney/Renal Function Test Market Trends:

Presently, there is an increase in the number of COVID-19 patients who are developing acute kidney injuries (AKIs) across the globe. This, in confluence with the growing instances of chronic kidney diseases (CKDs) on account of the rising number of individuals who consume alcohol and smoke, represents one of the key factors positively influencing the need for kidney diagnosis. Apart from this, numerous public and private health organizations are undertaking initiatives to spread awareness about kidney-related disorders and available testing and treatment facilities worldwide. This acts as another factor impelling the growth of the market.
