Rise in the fashion industry, boost in demand for footwear, and increase in population can be factors that can drive the growth of the global shoe care market. Apart from that, a rise in living standards and disposable income also drive the growth of the market. However, the rise in the cost and presence of duplicate products hinder the growth of the

market. Contrarily, the rapid growth of e-commerce and growing footwear brands can be an opportunity for the growth of the global shoe market.

People like to invest in good shoe care products that can help them maintain the properties of

the shoe. Dust and dirt on the shoe are inevitable, so companies offer full shoe care kit according to the type of shoe material such as leather and casual shoes. Every footwear needs different types of shoe care products.

Leather footwear needs more care as they can be damaged if proper care is not taken. Some companies have launched products like Saphir Omninettoyant cleaner or leather cleaner by R. K. William that make cleaning of leather shoes easy and make shoes look brand new.

COVID-19 Scenario Analysis:

- There is a decrease in the demand and sale for footwear and shoe care products in the market.
- China is the major exporter of footwear and accessories. Due to COVID-19, transportation is a restriction which has caused a decline in the export and import of goods from the country.
- However, an increase in the usage of online platforms can be a factor that can increase the growth of the market in the future.
