

Gardening Tools Market Expected To Exhibit A 4.51% CAGR By 2027, Says Market Research Future

The increase in the application of gardening tools and related equipment for commercial purposes can add to the growth of the gardening tools market.

NEW YORK, NEW YORK, UNITED STATES, January 10, 2022
/EINPresswire.com/ -- Market Scope

The increasing demand for gardens in residential and corporate constructions is projected to be one of the most significant factors driving the [gardening tools market](#) in 2020. Furthermore, the growing need for lawn tools in landscaping services can enhance the demand for gardening tools and develop the market. In addition, the increased demand for technically advanced gardening tools is projected to be another key factor underpinning the evolution of the gardening market during the forecast period. The increasing number of product launches is anticipated to boost the demand for gardening tools and boost the market.

Market Research Future (MRFR) studied the market in 2021 over the review period till 2027. As per MRFR findings, the gardening tools market size is projected to reach 112.09 billion by 2027 at a CAGR of 4.51% from 2019 to 2027. By 2027, the global gardening tools market is expected to value at USD 112.09 Bn.

Market Drivers and Restraints

The availability of different multipurpose garden tools with effective ergonomic designs is expected to favor the gardening tool market in the review tenure. The increase in the application of gardening tools and related equipment for commercial purposes can add to the growth of the gardening tools market. The surge in demand for gardening tools for cutting, trimming, and maintaining of commercial gardens and lawns, such as golf courses and sports fields, along with other infrastructural development can benefit the gardening tool market in the years to come. In addition, the enforcement of government regulations for maintaining public parks and green

spaces can fuel the gardening tools market in the approaching years. On the contrary, the increase in prices of advanced gardening tools can impede the growth of the gardening tool market.

Market Segmentation

The segmented study of the gardening tools market is based on type, distribution channel, product, and end-use.

The type-based segments of the gardening tools market are power tools and hand tools. The power tool segment is identified as the fastest-growing segment of the global gardening tools market. Turf and rounds equipment, lawnmowers, edgers, trimmers, blowers, sweepers, and vacuums are power tools that are used extensively for commercial end-users, such as commercial gardens, landscape service providers to maintain lawns, and public parks that can favor the expansion of the market.
