

Connected Aircraft Market Trends, Business Strategies and Opportunities With Key Players Analysis 2027

Connected Aircraft market technology and distribution channels, The report highlights key drivers, restraints, and opportunities of the global market 2027.

PORTLAND, ORAGON, UNITED STATES, January 10, 2022 /EINPresswire.com/ -- [Connected Aircraft Market](#) Outlook - 2027

The revolution has arrived in aviation industry in the form of connected aircrafts. Connected aircraft helps in improving fleet management, airline operations, aircraft turnaround time, flight safety, passenger experience, and costs. Connected aircraft concept allows the airline passengers to surf the internet at 30000 feet. Moreover, the concept of connected aircraft may boost the operational efficiency of the aircraft and can also improve communications, navigation, and surveillance (CNS) for air traffic management. Airframe manufacturing companies are also entering into connected aircraft business. For instance, Boeing is working on the possibility of offering satellite based In-flight Connectivity system (IFC) on its aircrafts such as 737s, 777s, and 787s.

The key players analyzed in the report include GOGO LLC., Inmarsat Global Limited, Honeywell International Inc, Panasonic Avionics Corporation, Global Eagle, Airbus S.A.S., BAE Systems, Cobham Limited, Thales Group, and Viasat Inc.

COVID-19 Scenario analysis:

Due to COVID-19 situation, the satellite launch plans of connected aircraft industries has taken a hit since major space agencies have postponed their schedule.

The demand of connected aircraft systems is affected due to the cancellation of large number of flights across the globe to curb the transmission of the virus.

Airline companies share prices have fallen up to 25% since the beginning of the COVID-19 pandemic, which may restrict companies to upgrade or improve their connected aircraft system. In such situation, connected aircraft market can be adversely affected.

Due to restrictions on travel worldwide, cancellation of airplane order may also be witnessed in near future by the airline companies which may affect the connected aircraft market. There will be a significant rise in demand for connected aircraft post covid-19.

Top impacting factors: market scenario analysis, trends, drivers and impact analysis

Focus on flight safety, growing demand of internet connectivity by passengers, and increasing procurement of new generation aircraft are the factors which drive the connected aircraft market. However, existing backlog of aircraft deliveries and cyber security concerns are hampering the growth of the market. Contrarily, upgradation of plans of military aircrafts from several countries may generate new possibilities in connected aircraft market.

Focus on flight safety

Currently airline industries are facing the need of real time weather data collecting systems in order to ensure flight safety from changing weather conditions. Such needs can be fulfilled by concept of connected aircraft. Hence, owing to the increase in the focus of the flight safety measures, the global connected aircraft market is expected to grow.

Demand of internet connectivity by passengers

Passengers demand high speed internet during their journey in aircraft. For meeting the needs of customers, aviation industries & operators are working on providing satellite-based connectivity solutions to the passengers. This will provide the fastest possible internet connections during the flight hours. Hence, demand in connected aircraft market is expected to increase in upcoming time owing to the demand of internet connectivity by passengers.

Key benefits of the report:

This study presents the analytical depiction of the connected aircraft industry along with the current trends and future estimations to determine the imminent investment pockets. The report presents information related to key drivers, restraints, and opportunities along with detailed analysis of the connected aircraft market share. The current market is quantitatively analyzed from 2020 to 2027 to highlight the connected aircraft market growth scenario.

Porter's five forces analysis illustrates the potency of buyers & suppliers in the market. The report provides a detailed analysis on connected aircraft market based on competitive intensity and how the competition will take shape in coming years.

Questions answered in the connected aircraft market research report:

- Which are the leading market players active in the connected aircraft market?
- What are the current trends that will influence the market in the next few years?
- What are the driving factors, restraints, and opportunities in the market?
- What are the projections for the future that would help in taking further strategic steps?

About Us

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
