

Pharmaceutical Granulators Market to exhibit a CAGR of 5.6% | L.B. Bohle, Alexanderwerk, GEA Group Aktiengesellschaft

Increasing demand for oral dose medications in the pharmaceutical industry is expected to drive growth of pharmaceutical granulators market.

SEATTLE, WASHINGTON, UNITED STATES, January 10, 2022
/EINPresswire.com/ -- Market Overview:

Granulators for pharmaceuticals provide pharmaceutical stability to tablets or capsules for use in the manufacturing of drugs. The increased stability of tablets will improve their dissolution. The decrease in tablet weight will improve the manufacturing efficiency of granulated preparations. This emulsification process also helps increase the dissolution time of tablets by reducing the surface area exposed to water. This makes it easy for manufacturers to produce high volume tablets.
