Testimonial by a Users

Person 1: I've been using Stayplain Social Media instead because it's just so much better! You can update your status with text, emojis and even video posts! The best part is that you don't have to worry about people finding out what you're doing when they see your post on their feed-- because there's no such thing as a 'feed' on this app.

2. I'll never forget the day I downloaded Stayplain. It was one of my first days of summer after taking a break from social media for two weeks, and to be honest the only thing that really kept me going were emails.

Do not forget to follow us, share to your friends and provide your comments.
