Moreover, it also gives meaningful as well as actionable insights on the competitive analysis of Big Data Analytics in Healthcare Market that are developing the current market scenario and which will be lucrative for the future demand of Big Data Analytics in Healthcare Market.

Why Key Big Data Market Players should positively target U.S. based healthcare sector?

Presence of various healthcare research institutes, medical advisories, highly advanced hospitals and much more in one of the world's leading economies opens up wide windows for healthcare oriented unstructured data to pile up every year. Adding to the similar concept, US healthcare value surpassing US\$ 3.6 trillion post COVID-19 which is approximately US\$ 11,237 per person shows the potential investment they hold for any technology able to benefit their healthcare sector.

Adding to above mentioned point, poor quality and highly unstructured data costs around US\$ 3 trillion to U.S. economy on yearly basis and this trend can also be seen in the data associated with their healthcare sector. Therefore, accounting to the high demand of data governance in healthcare and currently medical failure occurred due to COVID-19 impact associated with U.S. medical hub, exceptional business opportunities as present in this country.

How Cloud Deployment in Healthcare Data Management led to Gain Immense Traction and Bolster?

Out of the major deployment types practised in healthcare sectors, cloud management of healthcare data is expected to increase at a significant pace of 26.8% CAGR and occupy 65% of global share. This fact is directly associated with the impact of COVID-19 on healthcare that converted major on-premises dealings to a completely cloud interface.

In addition, almost every sector which once thrived with on-premises deployment now converted itself to an optimized online interface for the sake of sustainability in the market. Similarly, medical shops, medical test centres, local clinics, world-class medical facilities underpinned with online business required an optimized system to manage their data efficiently. Hence, a sudden demand for implementing cloud deployment system for data analytics confronted by above mentioned sectors globally.
