Increase in demand for color concentrates in packaging industries, consumer goods, automotive, and building & construction is driving the growth of the color concentrates market across the globe. The use of color concentrates of different shades for packaging makes the product more attractive, thereby driving their demand. However, high cost of color hamper the market growth.

Increase in demand from end-use industries, including packaging, agriculture, consumer goods, paint, agriculture (such as nursery films, greenhouse and mulch film) is boosting the growth of the color concentrates market. The automotive industry is expected to provide lucrative opportunities for color concentrate manufacturers in the near future. Consumers are shifting

their preference toward electric vehicles as compared to conventional vehicles.

Electric vehicles are made of plastics and composites, which is expected to drive the growth of the color concentrates market. Moreover, metal parts are being replaced by plastic components, thus increasing the use of color concentrates in vehicles.
