Future demand is expected to be bolstered by the global initiative to reduce the burden of malaria across both developing and developed nations. As of 2019, the W.H.O estimated that total funding for malaria elimination and control reached US\$ 3 Bn, which provided stimulus to Anti-malarial Hydroxychloroquine Drug production. That same year, 229 million active cases of malaria were detected, prompting countries to speed up eradication campaigns.

### Key Takeaways of Hydroxychloroquine Market Study

Due to skyrocketing demand for hydroxychloroquine, the global hydroxychloroquine market is expected to create a value opportunity of around US\$ 2.3 Bn by the end of 2020.

The coronavirus pandemic has spiked the prices of API (active pharmaceutical ingredients) which is set to increase the market value by 2X through 2020.

Based on drug type, anti-rheumatic drug has dominated the consumption of hydroxychloroquine in 2018 and is poised to account for nearly half of the market share by 2030.

Due to the high prevalence of rheumatoid arthritis and systemic lupus erythematosus, United States is projected to remain a highly lucrative region during the forecast period.

In terms of production, currently, India accounted for nearly half of the global production in 2019.

“Increasing prevalence of rheumatoid arthritis and systemic lupus erythematosus across the globe is poised to amplify the hydroxychloroquine market growth during the forecast period. The COVID-19 crisis will give an uptick to sales”, says the Fact.MR analyst.

Key Question answered in the survey of Anti-malarial Hydroxychloroquine Drug market report:
