

Urinary Catheters Market | Industry Sees Promising Growth in Coming Years

The urinary catheters market is analyzed based on regions to understand the regional trends across various geographies.

NE WIN SIVERS DRIVE, PORTLAND,
UNITED STATES, January 12, 2022

/EINPresswire.com/ -- According to the report by Allied Market Research, titled, "[Urinary Catheters Market](#) By Product (Indwelling catheter, Intermittent catheter, External catheter), and Application (Spinal cord injury, Urinary retention, Prostate gland surgery, Others): Opportunities and Forecasts, 2021-2028". The report provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

Allied Market Research - Logo

Urinary catheter is a partially flexible and hollow tube, which is used to collect and drain urine from the urinary bladder of patients suffering from medical conditions such as dementia, undergoing surgeries on body parts such as genitals or prostate, multiple sclerosis, urinary retention, and incontinence or spinal cord injury. As there is no treatment available for easy passing of urine from the body, urinary catheters are the only medical devices available that aid in this problem. Latex, silicone, or polyurethane is widely used to manufacture urinary catheters.

Large pool of geriatric population suffering from urinary disorders, growing demand for advanced urinary catheters, easy affordability of urinary catheters, and favorable reimbursement policies are the major factors fostering the demand of urinary catheters.

However, patient non-compliance, disposal concerns of used catheters, social stigma, and availability of substitutes are expected to hinder the market growth. About 75% of the UTIs contracted at hospitals are due to urinary catheters. The market players intend to develop advanced technologies, which cause less urinary tract infection to expand their foothold in the urinary catheters market.

COVID-19 scenario analysis:

The ongoing covid-19 pandemic is fuelling the Urinary Catheters Market industry. This is attributed due to the immense increase of covid-19 testing activities on the global diagnostics system. The demand of vaccine development for covid-19 has resulted in research towards covid-19 vaccine which has also boosted the market growth. For instance, in March 2020, Indian scientists have revealed microscopic image of novel coronavirus.

The high demand covid-19 testing and diagnostics has increased extensive investments towards addition to applications in vaccine research in the pharmaceutical sector which has also contributed towards the growth of the Urinary Catheters Market.
