

Extremities Market is Expected to Witness the Highest Growth Globally in Coming Years 2021-2028

Extensive analysis of the market is conducted by closely following key product positioning and monitoring the top contenders within the market framework

NE WIN SIVERS DRIVE, PORTLAND, UNITED STATES, January 12, 2022 /EINPresswire.com/ -- The world extremities market is driven by the increase in the number of cases for orthopedic surgeons several factors such as increase in ageing population, awareness of the people for better treatment options and their expectations for a good quality of living. In addition, changes in the clinical practice patterns such as use of

reversed shoulder instead of anatomic shoulder, use of arthroplasty procedure as an alternative to ankle fusion and increased use of implants in foot and ankle surgeries will also boost the market growth. Apart from this, development of new improved shoulders and ankles and need for less invasive devices will further propel the market growth. But the high unmet need for early

diagnosis due to long waiting time in some countries is expected to hamper the market growth.

Body extremities are extended organs mainly involved in locomotive functions. The human body has four extremities i.e. two upper limbs and two lower limbs. The extremities market is a small portion of the orthopedic industry. The joint reconstruction procedures involve modification of the body extremities. The human skeleton

has more than 200 bones which are supported by tendons, ligaments and muscles. Hence, the

prime focus of orthopedic industries was manufacture of devices and treatment procedures for joints, spine, knee and hip. But, now-a-days the focus of leading players on extremities market is increasing day by day as they offer better treatment options and provide growth opportunities to the key players.

COVID-19 scenario analysis:

The ongoing covid-19 pandemic is fuelling the Extremities Market industry. This is attributed due to the immense increase of covid-19 testing activities on the global diagnostics system. The demand of vaccine development for covid-19 has resulted in research towards covid-19 vaccine which has also boosted the market growth. For instance, in March 2020, Indian scientists has reveal microscopic image of novel coronavirus.

The high demand covid-19 testing and diagnostics has increased extensive investments towards addition to applications in vaccine research in the pharmaceutical sector which has also contribute towards the growth of the Extremities Market.
