Covid-19 is an infectious disease caused by a novel coronavirus. The first ever human encounter of the virus was reported in December 2019 in Wuhan City of China. The virus responsible for the cause of the disease is named severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). This nomenclature was chosen owing to the fact that the virus is genetically related to a type of coronavirus responsible for the SARS outbreak, which occurred in 2003. The Covid-19 outbreak was declared a pandemic by the World Health Organization (WHO), on March 11, 2020.

The outbreak has spread in over 199 countries and territories across the globe. As per the WHO, till March, 30, 2020, there were a total of 722,196 positive cases of coronavirus COVID-19 and 33,976 deaths worldwide.

The Covid-19 Diagnostics Market report keeps a perfect tab on the market share of several companies, recent market trends, revenue forecast, and new product launches across the market. The report includes company profiles that delineate the revenue share of the top competitors in the market. Simultaneously, the report provides revenue forecasts for four regions and more than twenty major countries across Asia-Pacific, LAMEA, North America, and Europe.

The market is segmented on the basis of product, technology, end-users, and region. By product, it is categorized into PCR Kits, POC (point of contact) Kits and immune-assay. By technology, it is segmented into PCR and immunoassay. By end-users it is segmented into hospitals, physician's office & urgent care clinics and diagnostic labs. Region wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.
